

Now you can bill Part D vaccines electronically with TransactRx

Starting May 1, 2021 providers will be able to electronically bill Medicare Part D vaccines (like the shingles and tetanus vaccines) at the provider's office, using TransactRx.

What is TransactRx?

TransactRx is an online resource that can help alleviate the burdensome process of manual billing and reimbursement for vaccine and vaccine administrative services.

TransactRx helps members minimize up front, out-of-pocket expenditures for vaccines. Enrollment in TransactRx is available at no cost to providers. Payment for submitted claims will come twice a month, directly from TransactRx to the provider.

Once enrolled, providers can:

- Verify members' eligibility and benefits in real-time
- Advise members of their appropriate out-of-pocket expense (copay, coinsurance) at point of service
- Submit vaccine claims electronically
- Receive reimbursement information in real-time

How to enroll

To learn more and enroll, providers can visit the [TransactRx portal](#). This is a one-time process that can be updated at any time. The following information will be required:

- Tax Identification Number (TIN)
- National Provider Identifier(s) (NPI)
- Medicare ID number
- Drug Enforcement Administration (DEA) number
- State Medical License number
- Acceptance of TransactRx Vaccine Manager's Agreement
